Report of the Auditors

SGW No.A216 (2016)

To the Board of Directors of Jiangsu Changbao Steel Tube Co., Ltd.

We have audited the accompanying financial statements of Jiangsu Changbao Steel Tube Co., Ltd. ("the Company"), including the balance sheet as of 31 December 2015, the related statements of income and cash flows for the year then ended, and the notes to these financial statements.

Responsibility of the management for the Financial Statements

Management is responsible for the preparation and the presentation of these financial statements in accordance with the Accounting System for Business Enterprises. This responsibility includes designing, implementing and maintaining the internal control relating to presentation of financial statements that are free from material misstatement due to fraud or error; selecting and applying the proper accounting policy; and making the reasonable accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Chinese Certified Public Accountants' Independent Auditing Standards. Those Standards require that we abide by the code of professional ethics, plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

An audit includes performing procedures to get the evidence supporting the amounts and disclosures in the financial statements. The selection of audit procedure depends on the judgment of the certified public accountants, including the assessment to the material misstatement risk of financial statements due to fraud or error. When conducting risk assessment, we consider the internal control relating to the presentation of financial statements so as to design proper audit procedure, but the aim is not to express an opinion on the effectiveness of internal control. An audit also includes assessing the properness of the accounting principles used and the reasonableness of accounting estimates made by management, as well as evaluating the overall financial statement presentation.

We believe that our audit gets sufficient and proper evidences and provides a reasonable basis for our opinion.

Auditors' opinion

In our opinion, the financial statements of the Company present fairly, in all material respects, the financial position of the Company as of 31 December 2015 and the results of its operations and its cash flows for the year then ended in accordance with the Accounting System for Business Enterprises of the People's Republic of China.

Jiangsu Changbao Steel Tube Co., Ltd.
Notes to the Financial Statements
2015

1. General situations

On Feb. 2, 2008, Jiangsu Changbao Steel Tube Co., Ltd. (the Company) changed its type of entity from the limited company to the incorporated company. With the approval of China Securities Regulatory Commission (ZJXK [2010] NO.1138), the company issued 695 million shares to public (par value is 1 Yuan) and became the listed company in Shenzhen Stock Exchange on Sep 21 2010. The company renewed the Business License of Legal Person for Enterprise (No.320400000015746) from Changzhou Administrative Bureau for Industry and Commerce on Nov 4 2010. The legal representative is Jian Cao. The registered capital is 400.1million RMB and the actual contribution situation is detailed in Notes "paid-in capital". The Company's approved operating scope includes the production of steel rolling, steel melting and steel tube, and sales of self-produced products.

2. Basis of presentation

The financial statements are presented on the basis of going concern.

3. Main accounting policies

Accounting policy

The Company carries out the Accounting System for Business Enterprises and relevant regulations as promulgated by the Ministry of Finance of the People's Republic of China.

Accounting period

The Company's accounting year starts on 1 January and ends on 31 December.

Reporting currency

The Company uses the RMB as its reporting currency.

Basis of accounting and measurement basis

The Company's accounting principle is accrual basis and the valuation basis is historical cost method.

Foreign currency translation

Transactions denominated in foreign currencies are translated into RMB at the market exchange rates on the last day of the last month when the transactions took place. Monetary assets and liabilities denominated in foreign currencies are translated into RMB at the market exchange rates at the end of the year. Exchange differences arising from these translations are taken to the profit and loss account, except for when they are attributable to foreign currency borrowings that have been taken out specifically for construction of fixed assets and are accordingly capitalized as part of the fixed asset costs.

Cash and cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Bad debts

Standard for bad debts

If the debtor has declared bankruptcy, has been dead or been liquidated, the accounts receivable cannot be recovered yet. And the accounts receivable is over three years and has been confirmed that cannot be recovered. The above accounts receivable should be recognized as bad debts.

Provisions for bad debts

Provision for bad debts is provided for using the "allowance method".

Based on the financial position, cash flows situation and other information, special provisions are made against residual balances of the receivables.

The bad debts rates are as follows:

Aging	Bad Debts Rate
Within 1 year	5%
1-2years	10%
2-3years	20%
3-4years	30%
4-5years	60%
5 years above	100%

Inventories

Inventories include raw materials, auxiliary materials, WIP, semi-finished goods and finished goods and are initially recorded at cost.

The inventories are accounted for at actual costs and the costs of sales are accounted for based on weighted average basis.

The low-value consumables are amortized entirely when they are sent out.

Inventories use perpetual inventory procedure.

When inventories are damaged, become obsolete or their selling price falls below cost and, as a result, their costs exceed their net realizable value, then the excess of their original costs over their net realizable value is taken as a "provision for inventory impairment". Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to conclude the sale.

Fixed assets and depreciation

The fixed assets refer to the tangible assets related to production, service, rent and

operation management whose service lives exceed one year and unit prices are high.

Fixed assets are accounted for in line with the actual cost method. The depreciation of fixed assets is calculated according to the straight-line method from the next month when the fixed assets are used. The net predicted residual value rate is 10% of the original value. All kinds of depreciation rates are shown as follows:

Categories of fixed assets	Depreciation period (years)	Annual depreciation rate (%)
Buildings	20	4.5
Machinery equipments	8-10	9-12
Electronic equipments	3-10	9-32
Vehicles	4-10	9-32

When events or changes in circumstances indicate that the carrying value of fixed assets are higher than their recoverable amounts, then tests for impairment are undertaken. If the carrying amount of a single fixed asset is higher than the recoverable amount, then the excess is recognized as an impairment provision and taken into the profit and loss.

Construction in process

Construction in process represents capital assets under construction or being installed and is stated at cost. Cost comprises original cost of plant and equipment, installation, construction and other direct costs. Construction in process is transferred to the fixed assets account and depreciation commences when the asset has been substantially completed and reaches the expected usable condition.

When events or changes in circumstances indicate that the carrying value of construction in process are higher than their recoverable amounts, then tests for impairment are undertaken. If the carrying amount of a single construction in process is higher than the recoverable amount, then the excess is recognized as an impairment provision and taken into the profit and loss.

Intangible Assets

Intangible assets are initially recorded at actual costs.

If they are bought the actual costs are the prices, and if they are contributed by the investor the actual costs are the value recognized by all investors.

Intangible assets are amortized averagely within expected usage period from the month when they are got. If the expected usage period exceeds the beneficial period regulated by the related agreements or laws, the amortization period does not exceed the shorter of the

beneficial period and the usage period.

When events or changes in circumstances indicate that the carrying value of intangible assets are higher than their recoverable amounts, then tests for impairment are undertaken. If the carrying amount of a single intangible asset is higher than the recoverable amount, then the excess is recognized as an impairment provision and taken into the profit and loss.

Interest costs

Interest costs on specific borrowings used to finance the capital assets, prior to the date of reaching the expected usable condition are costs of the assets, while after the date of reaching the expected usable condition, interest costs are accounted as financial expenses.

Revenue recognition

Sale of goods

Revenue from the sale of goods is recognized when significant risks and rewards of ownership of the goods are transferred to the customer, when the Company neither retains continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, when it is probable that the economic benefits associated with the transaction will flow to the enterprises and when the relevant amount of revenue and costs can be measured reliably.

Render service

Revenue from service is to calculate based on the completion percentage of related project. The precondition to recognize revenue is the overall earning and the completion percentage of service can be computed and confirmed reliable, the relevant money can be received as well as the service cost paid actually and paid in future can be calculated reliably.

Usufruct of assets transferred

Revenue from usufruct of assets transferred is recognized when the economic benefits associated with this transaction will flow to Company and when the relevant amount of revenue can be measured reliably. Interest income is measured according to the time transferred Cash and the applicable interest rate. Revenue from the usage is recognized in terms of the collected time and method stipulated on the related Agreement & Contract.

Income tax

The Company accounts for enterprise income taxes using the tax payable method. The taxable income is calculated according to the tax law.

Profit distribution

On March 30 2016, the board of directors made the resolution about the distribution of the profit of 2015. The board of directors planed to distribute the dividends (2 yuan per 10 shares) to all the shareholders.

4. Taxation

The main tax items and tax rates appropriate for the Company are as follows:

Value Added Tax

The output-tax is calculated at 17% of sales of steel tubes and at 13% of sales of gas, and the balance after deducting the input-tax is paid.

Enterprise income tax

The enterprise income tax rate is 15%.

Operation tax

The operation tax rate is 5%.

Construction tax

The construction tax rate is 7%.

Education supplementary tax

The education supplementary tax rate is 5%.
